

Dear Mr. Kimm,

After almost six months of applying the “Waterevolution” in our house, I would want to report to you my experience with it. First of all, my family and I are very satisfied with the device!

But one thing after another:

Why am I interested in the topic of water? As someone new to this topic, I have recently been asking myself the question of whether dietary supplements make sense or not. As you are aware, there are very diverse opinions on this topic, and the market is saturated with many different kinds of products. I wanted to find out more information on the topic of “vitality.”

I realized very quickly that water plays a key role in general, and particularly with respect to how it affects our bodies. For example, vital nutrients can only be absorbed by the body, on a cellular basis, if the water we drink is very clean and of a high energetic quality.

The factors that can play a central role in this are, for example, the surface tension, mineral colloids and charge (Zeta potential), the amount of water molecules (cluster size) and also the bonding angle of the water molecule. Until now, I had no idea that water is much more than the joining of two atoms of hydrogen and one atom oxygen.

I was astounded to read the books from Dr. Masaru Emoto (Water’s Message), who as a scientist has looked very closely into photographic water crystals. Only then did I realize that you have to take into account the fineness of the materials, to understand the many physical anomalies of water and the general effects on our organism.

Because humans are made up of at least 70 percent water, it fundamentally important what kind of water we take into our system. Not all water is the same! You could say that humans are living water crystals.

The water crystal pictures from Dr. Emoto speak a very clear language. These beautiful crystals in the book from Dr. Emoto show very clearly the natural geometry of harmony and order that can be found everywhere in nature. This perfect geometry in nature is referred to as the “golden mean.”

This harmony and order is then carried over to our bodies through the water of the “Waterevolution”, which results in more vitality and inner balance. Dr. Emoto can also prove in his experiments, that water has a memory and even a consciousness!

When you also observe the effects of quantum mechanics, it gets really interesting and one can imagine, that water, with all its characteristics, has been completely underestimated.

For me, water is a cosmic material that is full of secrets. I have also found out that water also stores information and energy.

When he was alive, the Austrian Viktor Schauburger was very intensively involved in observing nature and discovered that by swirling water, it is possible to give water its natural energy back that is has lost in the long trip it has taken through the water pipes.

For this reason, I came very quickly to the idea of the "Waterevolution", thank goodness. Here also, it shows beautiful and harmonious water crystals. In my point of view, the device brings together the effects of Schauberger (swirling) and at the same time informs the water at the fine material level.

What can I now write after six months of experience with the water from the "Waterevolution"? First of all, the water tastes great and has an almost sweet taste to it. In the meantime, I don't want to drink the normal mineral water anymore. It doesn't taste good to me anymore.

And because I understand the effects of water from the "Waterevolution", I don't want to drink any other water. My family and I drink several liters of the water from the "Waterrevolution" daily. It tastes good to all of us. I like to put fruit into a bowl of water, so that the fruit can absorb the water.

We have very calcium-laden water in our area. The calcium deposits on the water faucets and the sinks, as well in the pots have been noticeably reduced since we started using the "Waterrevolution". This was astounding to me, and was direct proof for me that „something“ was happening.

In my job a pilot, I even have a second portable "Waterevolution" with me wherever I go and after a stressful trip, I enjoy a comfortable bath, because it relaxes me and can regenerate faster this way.

It also allows me to comfortably remove the poisons from my body. What about colds? Ever since we have been using "Waterevolution", we don't have any more colds.

I have since replaced the water in our heating system with water from the "Waterevolution". This means that the water is now in our floor heating system. My family and I feel very energetic!

We are even expecting a child in the coming months, but of course I cannot directly prove that this has anything to do with the water. Personally, I'm convinced that I now know the effects of energized and informed water.

I would therefore like to thank you greatly for enabling me to get to know "Waterevolution" and I am deeply thankful to you. I can still remember very well the test bath with water from the "Waterevolution", which was very soothing to me. If you ask me, if someone is ready, then they will find the "Waterevolution".

Please say a warm hello to Ms. Lindtner from me.

Caminas, Brazil. January 2010.
