

Dear Mrs. Lindtner,

First of all I would like to say that I am utterly grateful for the first experience that I was allowed to make with Water Evolution. Altogether I had the chance of bathing at Aqua Ligro company four times within the last two weeks. And I was also allowed to take some bottles of Water Evolution water home. Having used a GIE Water Activator for seven years I can now give some new information about my experiences with Water Evolution concerning drinking

The Water Evolution water is an extremely soft water with a pleasant taste. The first time I drank it (approx. 1 litre) I noticed a very warm feeling going down from my head into my arms. It was something I had not experienced until then.

Now let me tell you about my first bathing experience. Sitting in the bathtub for 20 minutes I enjoyed the pleasant feeling of the water. Neither did I notice the water pressure on my chest in this water which usually is the case when bathing. The water temperature kept astonishingly long. After the bath I regarded myself in the mirror. My skin was very well circulated. I did not feel tired either. A deep inner warmth ran through my body. I had a very strong feeling of well-being, from head to toe, which endured for several hours. I remember having had this feeling of well-being as a boy when my dad took me to the sauna once a week.

Having taken a bath at Aqua Ligro company I had a rest and felt an inner quietness and deep relaxation.

I also noticed that my shoulder-neck muscles tremendously relaxed after each bath.

During my next three baths the experiences repeated themselves.

Different was the fourth bath in Water Evolution. I wrote down: "After such a bath I feel something like a deep inner peace and quietness inside myself. My muscles feel totally relaxed. I feel very warm all over, extremely warm, but with a deep feeling of well-being."

Furthermore I would like to mention that after having a bath it was easier for me to stroke my she-cat and tom-cat:

When I came home from my therapeutical work in an Ayurveda clinic in

Kassel my cats did not allow me to pet them. At the same time I noticed a strong tension in my shoulder-neck-part. Right after the bath the cat jumped on my lap.

Water Evolution water helps me to overcome stressful situations. During the two weeks of testing the water it was worth the trouble of travelling from Gudensberg to Lippetal to the Aqua Ligo company to have a bath. Driving home the 155 km was a lot easier and the tension in my shoulder and neck, which I usually feel, did not appear.

My day always starts early at five o'clock, even at the weekend. Since I practice meditation, do exercises in concentration and other things I am happy when I can start the day energetically.

Apparently it was easier for me during the last two weeks to do the exercises. I am quite happy about that. In the morning my bowel movement is better and more voluminous than usual.

During the time I could not take a bath at the Aqua Ligo company I drank the water. I drank approx. 1 litre a day, sometimes mixed with juices, and so did my family.

As a non-medical practitioner I can only congratulate you to this great invention. I have already ordered a Water Evolution device and my wife is looking forward to seeing what the water will do to her.

Gudensberg, 22.5.08

Since April, 10th I have owned the Water Evolution device. Since that time I have bathed very often. The experiences I made at the Aqua Ligo company repeated themselves. I would like to mention the strong feeling of well-being, the deep relaxation and the inner feeling of warmth. During the night I often have to turn my cover round (even my thinner cover) because of my inner feeling of warmth. I did not know this before. Formerly I was cold more often which has no longer been the case for some weeks now. Meanwhile even sauna

over 80 degrees Celsius is much too warm for me and I feel unwell afterwards. I feel different when the sauna is only 45 degrees.

Something else can be said.

Working with a hot-air gun (paint stripper) I sustained a blister on my right index finger. When I wanted to drive away in my car I first did not notice my sore finger, during the ride it terribly started aching. Luckily I had some bottles of Water Evolution water in the boot, so I poured it on my wound several times. I was amazed that the burning immediately stopped. So I could carry on driving. Then the pain started again. 25 km further I repeated my attempt to calm down the pain with Water Evolution water. This time it was a bit more efficient. After this I was free from pain for two hours so that I could go shopping in peace. At home it started again but this time not that bad. It was also obvious that the blister was not as big as usual.

Having being a regular user of Water Evolution water for some time now, my desire for activity has increased. Thus I experience physical action, like garden work, differently and afterwards I do not feel as exhausted as formerly. Activities I could hardly cope with before, can now be done very easily. My mental balance is characterized by a great well-being and power, and I am allowed to focus my attention on other things now. Even my concentration and attention have developed positively.

Something else to be reported.

The water is also very useful in the household. You need less detergents and washing powder. Even the washing is much softer and easier to be ironed.

And there is something else:

As I remarked earlier the water keeps its temperature for a longer time. This is why I induced the plumber to fill the water into the heating circulation. Even the tap water is Water Evolution water now.

If you do have any questions concerning my explanations please contact me. My report may be copied and be passed on.
